

## **Homework 2**

Jack Vo, Haru Chu, Nicholas Krouse

### **Instruction for running:**

The whole program was programmed using Repl.it, but it can run well on Microsoft Visual Studio as well.

### **Contribution:**

**Nick:** Created pseudo code for the classes and main implementation, as well as debugging of the main program

**Long:** Wrote the main function, as well as definition of classes, takeNum() function, exit() function, formatting the code, implement play() function

**Haru:** Wrote the hard mode, as well as the intricacies of changing Dealers wheel based on house winning twice in a row/losing, modify the play() function with double/halve chance.

### **Grade distribution:**

Same grade distribution for everyone.
